PAESMEM/Stanford School of Engineering Workshop on Mentoring for Academic Careers in Engineering

Workshop presentations and *Proceedings* are available at http://paesmem.stanford.edu/

In June 2004 a workshop was held at Stanford University on the subject of mentoring for academic careers in Engineering. The workshop provided a forum on the needs, goals, methods, and best practices for mentoring engineering students interested in an academic career, for young faculty beginning such a career, and for recently tenured faculty. The emphasis was on mentoring members of underrepresented groups in academic engineering, especially women. The workshop was jointly supported by the Presidential Award for Excellence in Science, Mathematics, and Engineering (PAESMEM) through the National Science Foundation and by the School of Engineering at Stanford University.

The workshop had two primary goals: to provide an opportunity for mentors, mentees, and mentoring facilitators to educate each other, and to produce proceedings of the workshop summarizing the talks and discussions. Links to the individual talk slides and to the workshop proceedings may be found in pdf and html format at http://paesmem.stanford.edu/. A paperback book of the proceedings has been published and is available from rmgray@stanford.edu while the supply lasts.
